NOTES:

The interview will be conducted using Computer Assisted Personal Interviewing (CAPI), in which interviewers read questions from and enter data directly into a laptop computer. The script for the interview uses a variety of 'textfills' to customise question wording so that it is appropriate to individual circumstances. For example, the script will substitute either 'husband', 'wife' or 'partner' depending on the gender of the interviewee and/or the nature of their relationship.

All textfills are signalled in the paper questionnaire by the character '^'. For example, wherever the text reads *^he*, the computer will substitute the appropriate pronoun; wherever the text reads *^childname*, the computer will substitute the child's actual name.

Questions were also routed on key variables – e.g. gender of participant, whether they are part of a lone or two-parent household, etc. Key routing is indicated.

Arrows (>) have been used to show the level of filtering: no arrows means that the question has been asked to ALL, one arrow indicates 1st "IF" condition, two arrows indicate 2nd "IF" condition embedded in the first, etc.

O. Interviewer Observations

G.1	Respondent spontaneously praises child's qualities or behaviour at least twice during the visit. INTERVIEWER: The key word here is 'spontaneous', but since most parents enjoy talking about and are proud of their children, this is not hard to observe. Frequently a parent will tell you how well her child throws a ball or runs and will brag about how well he/she dresses himself/herself or can get his/her own drink. Question refers to parent speaking about or to the child.	
	Yes (at least twice)	1
	No	2
	Can't tell – including does not speak English	3

G.2	Was the child present during the interview?		
	Yes	1	Go to G3
	No	2	FINISH

G.3	How would you describe the child's behaviour towards you up to the point of assessment ?	
	Distressed by your presence	1
	Initially reserved, never approached you	2
	Initially reserved, approached you later	3
	No reserve	4
	Unable to assess	5

G.4	Up to the point of assessment , did the child look at you as if to invite conversation (the child does not have to smile but, the eye contact must be of a quality that would invite you to communicate in a "normal" social setting)?	
	Yes	1
	No	2

G.5	Up to the point of assessment , did the child spontaneously move towards and/or approach you?
